

Parasitic nematodes perform heric migrations

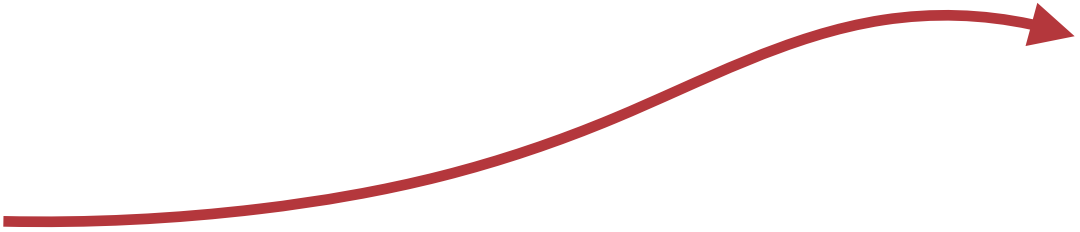

# Tracheal migration of larvae

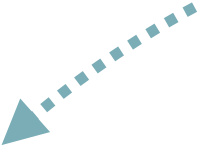

Back to the gut

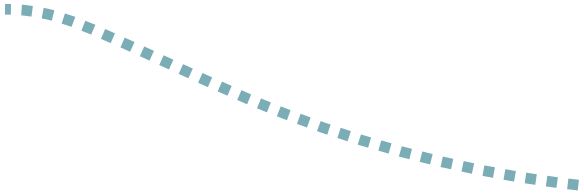

Mfinngested

Mf migration to FMMT

# L3 migration to head

**So initiated the ninth**

**Finaria natus**

*What is the molecular basis for chemosensation in filarial parasitic nematodes?*

# Parasitic nematodes perform heroic migrations

Eggs ingested

Tracheal migration  
of larvae

Soil transmitted helminths

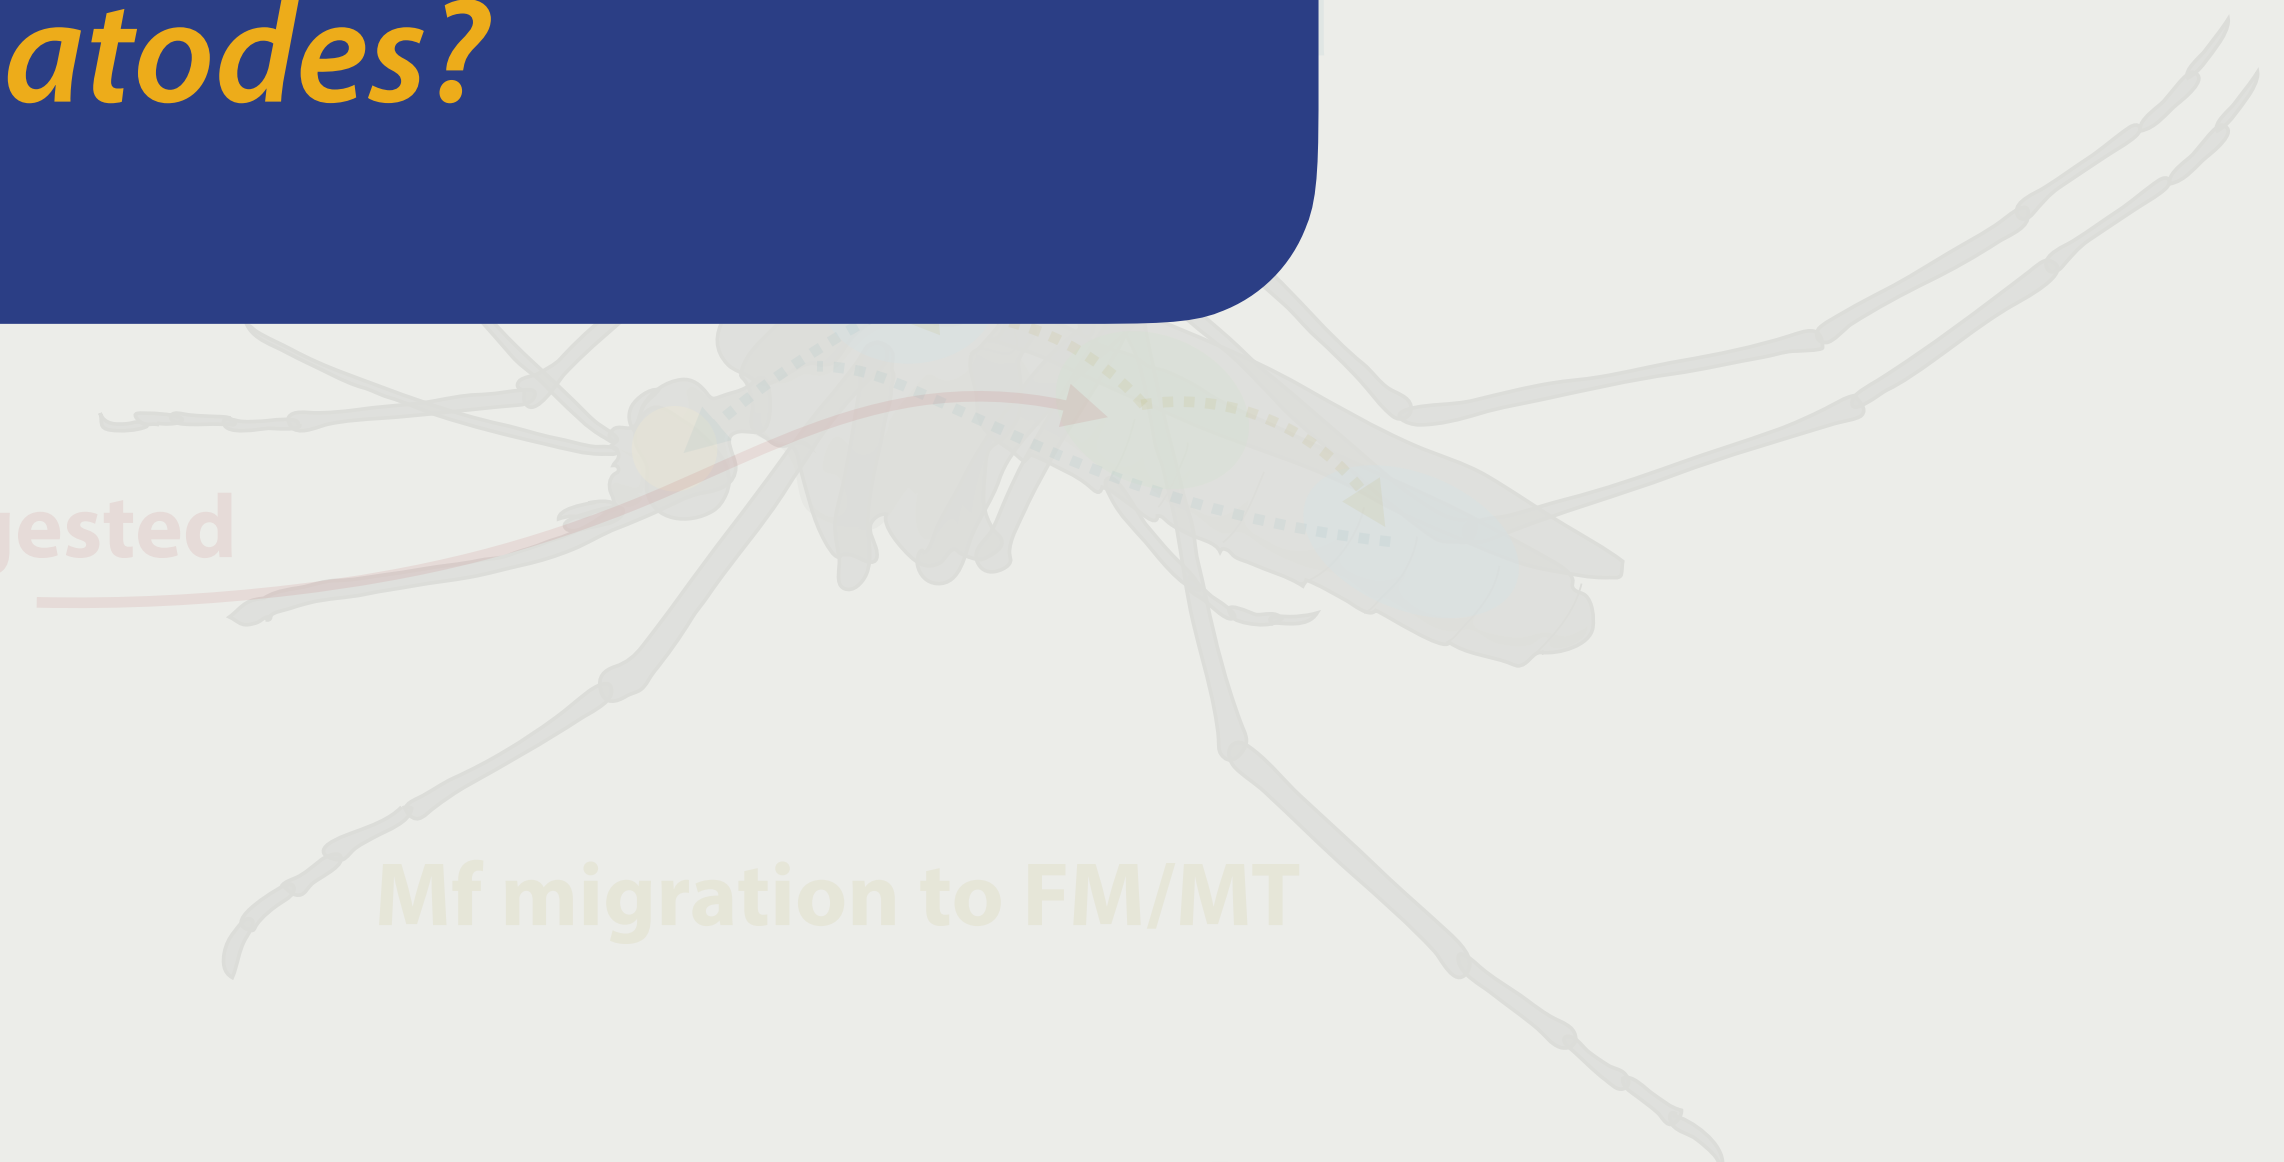

*What is the molecular basis for chemosensation in filarial parasitic nematodes?*

Mf ingested

Mf migration to FM/MT

Filarial nematodes

# Hints from others nematodes
